

Add or Subtract Bingo

Please feel free to take...

- 1 set of game directions and master game boards

Please feel free to make...

- 1 special game cube (write + on 3 sides and - on the remaining 3 sides)

You will need...

- Wooden cube
- Markers

This is a nice game that reinforces addition and subtraction skills. The advanced game board is meant to be used with special 12-sided dice. You can differentiate it for lower/higher abilities by changing the dice and game boards. You may even have 2 children play with separate game boards and dice based on their abilities. It is a fun *Math with Someone* game.

ADD OR SUBTRACT BINGO

Materials: Bingo cards, chips/markers, two 6-sided dice (or two 12-sided dice), one special die with +/- sides

Number of players: 2 to 4

Directions: Player 1 rolls all 3 dice and looks at the operations die to determine whether he must add or subtract. Player 1 finds the sum or the difference of the two number dice. Player 1 looks for an open space on the board that shows the answer.

Only one space may be marked on a turn, even if more than one space is available with the correct number. If no open spaces show the needed number, the turn passes on to the next player.

Players take turns rolling the dice, finding the sum or difference, and placing markers on the boards. The first player to get four markers in a row wins.
